

Q3 - 2020

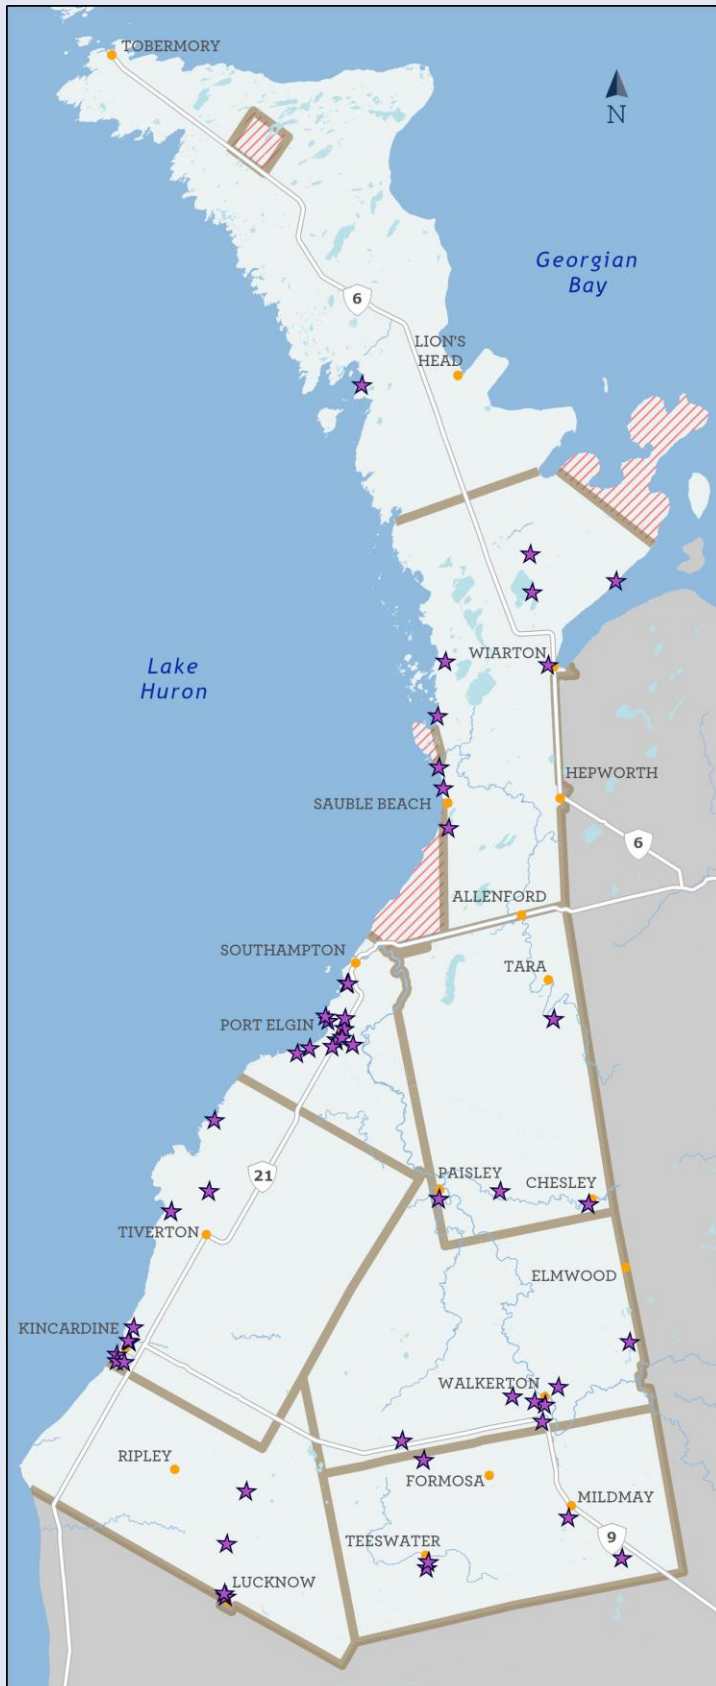

Planning Dashboard

3rd Quarter Highlights

Application activity picked up in the third quarter after a slower second quarter. The residential sector was strong, particularly smaller-scale construction projects with variance applications. Residential lot creation was also strong, with 88 subdivision lots, including 14 townhomes, in the Summerside and Walker West Estates subdivisions in Port Elgin and Walkerton respectively. The Agricultural sector continued to be resilient, with five farm consolidations. Notable institutional, commercial and industrial applications include zoning amendments to address burdensome provisions in Saugeen Shores and permitting Licensed Cannabis Operations in Walkerton.
