Subject: RE: Growth Management and Commercial Land Needs Analysis Feedback Followup

Hi Jack,

Thank for the reminder that you were looking for our feedback. I did review the maps and they are an accurate description of our core areas. We did discuss changing the classification of the area north-east of the intersection in Ripley and I am going to assume you don't need anything further from us on that.

I will also confirm that the needs analysis is accurate for H-K. We would like to say that more commercial area is needed but we are not seeing that demand at this time.

Let me know if you need anything further.

Matt
